PROFILE

A versatile, adaptable and collaborative software professional skilled in designing, implementing and maintaining large scale reusable and maintainable software solutions. Highly experienced in Back-end/REST API development in PHP. Also have solid Front-end development and server administration experience. I love to write clean code and follow best practices. Seeking to move into a new engineering position where I can take new challenges and excel my knowledge. Exploring segments of DevOps, React.js, Golang and large scale application architecture related skills.
